

Amendments to the Specification:

Kindly amend the specification as follows:

On page 4, replace the last full paragraph with the following:

With brushless DC technology, the rotor 160 is actuated by electromagnetic fields that are generated by electric current flowing through windings of the stator 170. During operation, the pump shaft 150 transmits torque from the motor section 102 to the pump section 101 to pump the fluid. The motor section 102 can include an electrical controller 220~~(not shown)~~ suitable for operating the pump assembly 100. The electrical controller 220~~(not shown)~~ can include a commutation controller (not shown) for sequentially firing or energizing the windings of the stator 170.
